

Assignment No:1

Good design:

1.

This is the new passage that has been created. Previously, there was no space to move to the other side of the stationary, and if someone wanted to go to the opposite side, they had to either go down and then come up again.

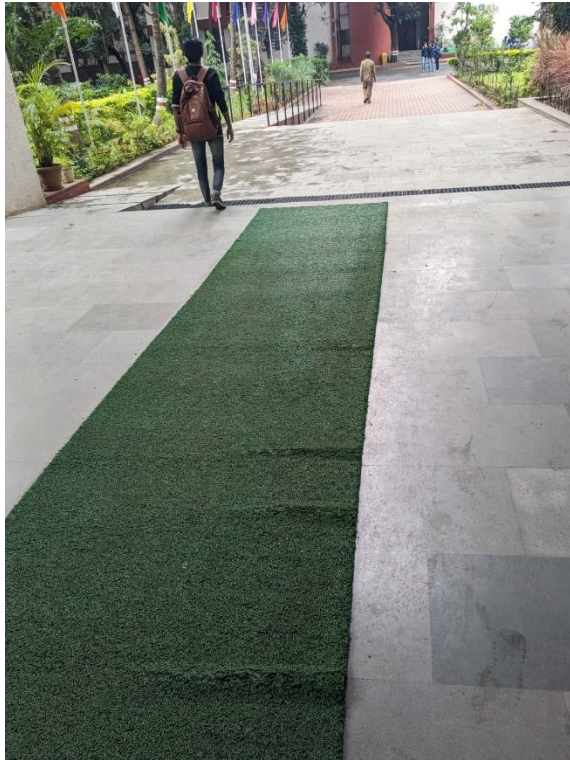

By creating a passage now, anyone can move from one side to the other side of the stationary without any trouble.

2.

The newly created slant path is beneficial for people with disabilities as it enables them to move easily without having to use stairs.

3.

In the rainy season, carpets play an important role in keeping the floor clean.

4.

There is a stack provided outside the canteen to keep umbrellas, ensuring that water from the umbrellas doesn't make the canteen dirty. Additionally, there is a sign or a label indicating that the stack is specifically for keeping umbrellas.

5.

The switchboard is designed perfectly, allowing us to easily identify the correct switch for each holder.
